

數碼地面電視服務

Digital Terrestrial Television Services

香港已於2020年12月1日實施全面數碼電視廣播。現時數碼地面電視已覆蓋全港不少於99%的人口。

Full digital terrestrial television (DTT) broadcast was implemented in Hong Kong on 1 December 2020. The DTT coverage reaches at least 99% of Hong Kong population.

數碼地面電視服務

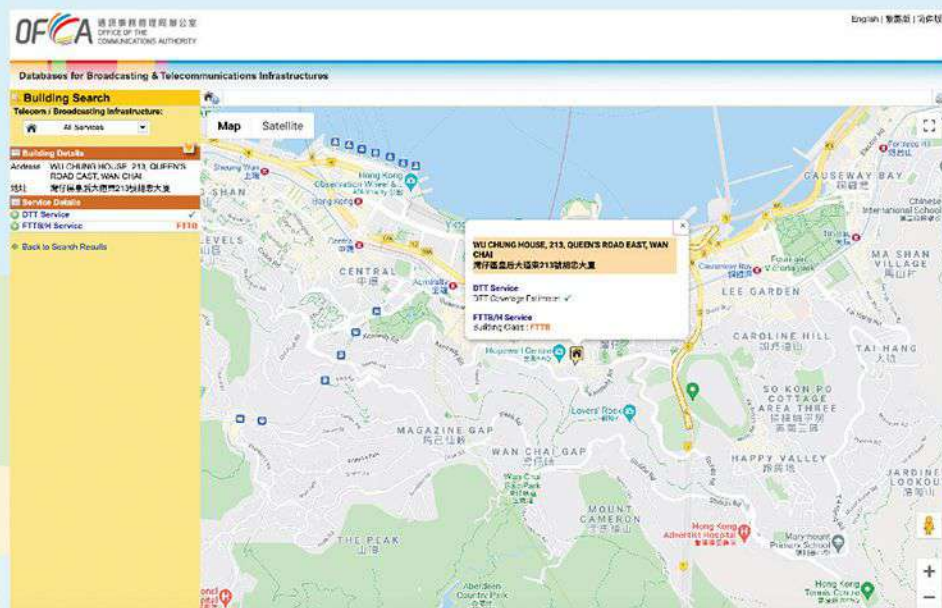

Reception of DTT Programme Channels

- 要透過無線電頻譜接收由免費電視台提供的數碼地面電視節目台，多層大廈的住戶一般使用公共天線系統，而村屋及唐樓的住戶則大多使用自設天線。

To receive DTT programme channels provided by free TV broadcasters via radio spectrum, residents of multi-storey buildings generally use common antenna broadcast distribution systems while residents of village houses and tenement buildings mostly use self-provided antennae.

- 你可透過以下資料庫查看個別樓宇的數碼地面電視服務覆蓋預測。

You may check on the following database for the estimate of the DTT coverage for individual buildings.

接收新推出的電視節目台

Receiving Newly Launched TV Programme Channels

- 香港現時有14個數碼地面電視節目台，其中四個節目台在2022年推出。要接收這些新的節目台，你可能需要使用你的電視機／機頂盒進行重新搜台。

Currently, there are 14 DTT programme channels, four of which were launched in 2022. To receive new DTT programme channels, you may need to perform the rescanning on your TV sets / set-top boxes.
