6個數碼電視節目台轉用 新發射頻率

*Migration of Six Digital
TV Programme Channels to
New Transmitting
Frequencies*

住戶須知

Notes for Residents

From **1 December 2021, 00:00** onwards, the following six digital TV programme channels will be migrated to new transmitting frequencies. The six digital TV programme channels will simultaneously broadcast on both the existing and new transmitting frequencies **from 1 April to 30 November this year (Digital Simulcast)**.

Digital TV Programme Channels	Channel Numbers (Remain Unchanged)	New Transmitting Frequencies
RTHK TV 31	31	UHF Channel 27 (518-526 MHz)
RTHK TV 32	32	
RTHK TV 33	33	
Jade	81	UHF Channel 37 (598-606 MHz)
ViuTVsix	96	
ViuTV	99	

How to continue to receive these six digital TV programme channels?

Public Housing Estates

- The Housing Authority or the Housing Society will arrange for the reconfiguration of the common antenna broadcast distribution (CABD) systems.
- Residents should pay attention to building management notifications of whether and when they need to rescan the digital TV programme channels on their TV sets or digital terrestrial television (DTT) receivers.

CABD System

Do not need to replace existing digital TV sets or set-top boxes

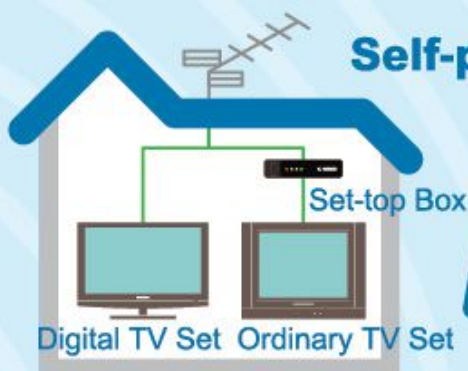

Private Residential Estates / Buildings / Housing Courts of Various Subsidised Home Ownership Schemes

- Residents generally receive TV signals using CABD systems of their buildings. Responsible parties of the CABD systems should engage contractors to reconfigure the systems within the Digital Simulcast period.
- Residents should pay attention to building management notifications of whether and when they need to rescan the digital TV programme channels on their TV sets or DTT receivers.

Village Houses / Bungalows / Old Tenement Buildings or Three-nil Buildings without CABD Systems

- Residents generally receive TV signals using **self-provided antennae (commonly known as "fishbone antennae")**.
- If residents cannot receive any of the above digital TV programme channels **after 1 December 2021, 00:00**, please rescan the digital TV programme channels on their TV sets or DTT receivers.

Self-provided Antenna

Do not need to replace existing antennae, digital TV sets or set-top boxes

Points to note for "three-nil buildings" residents

"Three-nil buildings" refer to buildings without incorporated owners, residents' organisations and building management offices. For those three-nil buildings or old tenement buildings installed with **CABD systems**, residents should engage contractors to reconfigure the systems within the Digital Simulcast period, and check with the contractors whether and when they need to rescan the digital TV programme channels on their TV sets or DTT receivers.

如何進行「重新搜台」？

請參閱電視機 / 數碼地面電視接收器材使用手冊內有關重新搜台的步驟，或直接向有關設備的供應商查詢。你亦可瀏覽設於通訊事務管理局辦公室（通訊辦）網站內的專題網頁，參考各主要品牌電視機 / 數碼地面電視接收器材重新搜台的詳細步驟或觀看示範短片。

How to "rescan the digital TV programme channels" ?

Please refer to the user manuals of TV sets / DTT receivers for the procedures to rescan the digital TV programme channels or consult the equipment supplier directly. You may also visit the thematic webpage set up on the Office of the Communications Authority (OFCA)'s website for step-by-step instructions or video clips on how to rescan the digital TV programme channels on major brands of TV sets / DTT receivers.

這次轉用新發射頻率只會涉及上述六個數碼電視節目台，不會影響其他數碼電視節目台：J2台 82、無綫新聞台 83、明珠台 84及無綫財經·資訊台 85，以及香港國際財經台 76及香港開電視 77（如目前已能接收這些節目台）。

The migration to new transmitting frequencies will only involve the above six digital TV programme channels, and will not affect other digital TV programme channels: J2 82, TVB News 83, Pearl 84 and TVB Finance & Information 85, as well as Hong Kong International Business Channel 76 and Hong Kong Open TV 77 (if currently already receivable).
