Remarks:

C1 is the number of Number Portability Request (NPR)* in the off-line electronic number porting platform.

C2 is the number of Advice of Porting Number (APN)* in the off-line electronic number porting platform.

C3 is the number of Successful Completion of APN (SCAPN)* in the off-line electronic number porting platform.

C4 is C3/C1 and it represents the success rate against all number porting requests.

C5 is C3/C2 and it represents the success rate against all number porting requests accepted by the Donor Network Operator (DNO)*.

註:

C1 是離線電子號碼轉攜平臺的號碼轉攜要求 (NPR) *數字。

* These are terms adopted by the specification HKCA 2102 – “Procedures for Handling Number Porting by Database Solution” issued by the Communications Authority. If a telephone number is to be ported from operator A to operator B, A is called the Donor Network Operator (DNO) and B the Recipient Network Operator (RNO). The RNO will submit the NPR to the DNO based on the consumer’s requirement. Upon receipt of the NPR, the DNO will check the details and acknowledge the NPR. The RNO will then issue the APN if it has successfully negotiated the porting details with the DNO. The RNO will issue the SCAPN when the number porting is completed. The number of APN issued by a RNO may be less than that of NPR because there are requests which may not have been accepted by DNO or not proceeded by the RNO due to various reasons such as mismatch of information, cancellation initiated by the customer, unavailability of circuit or the service transfer date cannot be arranged in the manner as requested by the consumer. In such cases APN will not be issued by the RNO.

* 此等名稱源自通訊事務管理局發出的HKCA 2102規格 -以數據庫解決方案處理固定號碼可攜的程序。倘若電話號碼由營辦商A轉攜至營辦商B，兩者將分別稱為供號網絡營辦商及受號網絡營辦商。受號網絡營辦商將按照消費者的要求提交NPR予供號網絡營辦商。供號網絡營辦商收到NPR後，將核查詳細資料及認收NPR。倘若受號網絡營辦商與供號網絡營辦商的轉攜資料配對成功，受號網絡營辦商便會發出APN，並於完成號碼轉攜後發出SCAPN。由於數據錯配、消費者要求取消申請、線路不足或無法在消費者要求的日期轉攜服務等情況，會令供號網絡營辦商未能接受申請或受號網絡營辦商放棄申請，因此受號網絡營辦商發出APN的數字或會少於發出NPR的數字。在該等情況下，受號網絡營辦商將不會發出APN。

Notes:

1) The success rates A and B indicate the situation of porting among operators at different stages. Unsuccessful portings are mainly due to rejected or cancelled applications which can be re-submitted after rectification of information or confirmation of the revised service transfer date. Nearly all relevant customers can eventually port out the numbers for their fixed services successfully.

註釋:

1) 成功率A及B表示營辦商在不同階段轉攜號碼的情況。轉攜不成功大多涉及被拒絕或取消的申請，但經修正數據或確定更改轉攜的生效日期後，該等申請可再次提交處理。差不多所有有關的客戶最終均可成功轉攜固定服務的電話號碼。

2) Effective from 1 September 2004, the maximum lead time from the request of number portability to the completion of actual cutover extended from one calendar month to a range of two to three calendar months. It should be noted that applications submitted and recorded as NPR in a month might be completed and recorded as SCAPN in subsequent months. As a result, the successful portings (C3) completed in a reporting month might be more than the number of submitted applications (C1) and confirmed number portings (C2) within the same month, i.e. the success rate A (C4) and success rate B (C5) might be greater than 100%.

2) 自二零零四年九月一日起，提出電話號碼轉攜的申請至最終完成轉攜的時限由一個曆月延長至二至三個曆月。需要注意的是，有關申請（即提交NPR）的月份或會在其後的月份完成（即發出SCAPN）。因此，在號碼轉攜統計數字公布月份內成功轉攜數字(C3)有可能比已遞交的申請數字(C1)及已確認的轉攜數字(C2)為多，即成功率A(C4)及成功率B(C5)或會大於100%。

3) To enhance the success rate and facilitate the smooth processing of ONP, customers are advised to keep a copy of their current service contract and the most recent bill for easy reference to ensure that the information given to the RNO matches with the information of their existing operator (i.e. DNO). If a customer is not sure of the accuracy of the registered information, he/she should approach the existing operator to check or update the information before switching to another operator. 3) 為提高成功率及使固定號碼轉攜順利進行，客戶應保存現有服務合約的副本及最近一期的帳單，以供參考及確保給予受號網絡營辦商的數據與現有營辦商的數據相符。如客戶不肯定登記數據是否準確，便應該向現有營辦商查詢或更新數據，然後才改用另一家營辦商。消費者可瀏覽以下網址以取得更多資訊：
