PT Mobile-8 Telecom Tbk. would like to thank the Office of the Telecommunications Authority (OFTA) for the opportunity to provide comments to the consultation paper, *Licensing of Spectrum in the 850 MHz Band to Enable the Provision of CDMA2000®*. Mobile-8 applauds OFTA for the intent to make available the 850 MHz frequency band for the deployment of CDMA2000 after November 2008 in Hong Kong.

Mobile-8 is Indonesia's first commercial CDMA2000 cellular operator, delivering services on our CDMA2000 1x and EV-DO networks in the 850 MHz band to over 1.3 million subscribers today. Through its own nationwide 850 MHz CDMA network, Mobile-8's coverage area currently extends to all major cities and most secondary cities as well as some rural areas across Java and Bali. On May 2nd, 2006, Mobile-8 became the first CDMA2000 cellular operator in Indonesia to commercially launch a 3G high-speed mobile Internet service in Jakarta based on CDMA2000 1xEV-DO platform that can deliver high speed data access up to 2.4 Mbps.

Currently, Mobile-8 provides international roaming services to its customers through its roaming partners in 22 countries, one of which is Hong Kong. Because many of Mobile-8's customers enjoy frequent travel to Hong Kong for both business and leisure activities, your decision to ensure the availability of CDMA services beyond November of 2008 is very important to and much appreciated by Mobile-8 and our Indonesian customers.

Mobile-8 would again like to thank OFTA and offer our sincere support for your proposed spectrum plan in the 850 MHz band. We feel confident that this decision will not only benefit consumers and businesses within Hong Kong, but will have a positive impact on the Asia-Pacific region as a whole.

Sincerely,
PT. Mobile-8 Telecom Tbk.
