Interconnection Service

1. The interconnection service means the provision of interconnect and/or conversion equipment to connect the Customer Equipment via the Lead-in Fibre to the capacity acquired by the Customer in a Cable System (“**Interconnection Service**”).
2. The configuration of the provision of the Interconnection Service is shown in the following diagram:

Cable Station Co-location

3. Specifications of Interconnection Service.

3.1 will provide the following:

- (a) Conversion, multiplexing, interconnect equipment and ODFs inside the Cable Station Main Building, cable racking and/or ducting required inside or outside Colocation Space;
- (b) interconnection from the Cable System to the ODF where the Lead-in Fibre is terminated, via one of the following:
 - (i) Electrical to Optical (E2O) as described in 3.4;
 - (ii) Electrical to Optical and multiplexing (E2O Conversion and MUXing) as described in 3.4;
 - (iii) Direct optical fibres (O2O) as described in 3.2;
 - (iv) High Level Interface (HLI) Muxing as described in 3;
- (c) interworking testing of the Customer's equipment with conversion and interconnect equipment; and
- (d) any other requirements agreed between and the Customer.

- 3.2 The E2O with Muxing Interconnection Service connects to the Cable System using electrical T3 or E1 interfaces. The T3 and/or E1 circuit(s) are mapped to an optical STM-1 interface using multiplexing equipment and presented to the Customer at the ODF inside the Cable Station main building. will perform new assignment, re-configuration and deletion of E1 or T3 capacity as requested by the Customer in consideration of the payment to by the Customer as set out in Schedule 2.
- 3.3 For E2O the Interconnection with the Customer's equipment will be provided at increments of STM-1 optical level in relation to the Cable System. The E2O Interconnection Service connects to the Cable System with an electrical STM-1 interface and converts this to an optical STM-1 for connection to the ODF.
- 3.4 The O2O Interconnection Service is provided on a fibre pair basis irrespective of the bandwidth (not applicable to)
- 3.5 High Level Interface Muxing Service (HLI Service) connects to High Level Interfaces on the Cable System and hands off optical STM-16 or STM-64s to the Customer. Where the Customer takes a full port on the Cable System will perform new assignment, re-configuration and deletion of STM-N capacity as requested by the Customer in consideration of the payment to by the Customer as set out in Schedule 2.
- 3.6 Charges for the HLI Service shall be based on the size of the interface in the case of full ports or services to be mapped in the case of a shared port (Input) and the STM-N service handed over to the Customer (Output). Several smaller Inputs may be mapped to a larger Output.
- 3.7 The HLI Service is subject to the Cable System rules governing the use of HLI.
- 3.8 Save for in cases of emergency (in which case shall give the Customer as much notice in advance as practicable in the circumstances), shall not rearrange, disconnect, remove, repair or otherwise interfere with the Customer's interconnection installed for the purpose of connection to the Service unless agreed by the Customer or otherwise provided for under this Agreement.

4. Service Limitations

- 4.1 The Service excludes acquisition of capacity in the Existing Cable System and related circuit restoration and re-configuration. The Customer has to arrange for itself the right of use of circuit capacity in the Existing Cable System landed at the Cable Station.
- 4.2 The parties agree that the terms and conditions in relation Interconnection as set out in this Agreement may be applied to any future submarine cable systems landing in the Cable Station (if any) at discretion
